Pedro Moreno

Full Stack Web Developer

+(1) 210 394 5800 | San Antonio, TX | pedroa.moreno10@gmail.com | Github | Website

Summary

Web developer focused on building user-centered applications through self-directed projects and real-world freelance work, with an emphasis on clean UI, thoughtful product decisions, and scalable front-end architecture.

Core Skills

Languages: HTML, CSS, JavaScript, TypeScript

Frameworks: React, Next.js

Backend: Node.js, Express, PostgreSQL, MongoDB

Tools: Tailwind CSS, Github, REST APIs, Auth, Cloudinary, Figma

Projects & Case Studies

Glass Codex — Product Case Study & Full-Stack App *(2026 - Present)*

- Conceived, designed, and built a character-focused web app to explore product design, UX tradeoffs, and scalable data modeling
- Prioritized feature depth and scope to reduce cognitive load while supporting future extensibility
- Authored a full product case study documenting research, design decisions, and technical implementation
  Live Demo | Case Study | Github

Pokemon Nuzlocke App

- Built a full-stack application to track player encounters and progression across different Pokémon games using React, Node.js, Express, and MongoDB.
- Designed a custom database schema for efficient management of game data.
  Github

Freelance Website for Garibaldi Mexican Restaurant

- Designed and developed a responsive multi-page website using React and Tailwind CSS in collaboration with a local client.
